"shop vision" Domus Academy 2003

Consultant REBUILD <http://www.rebuilditalia.it/en/>

Since its first edition **REbuild has represented a platform** for analysis, learning, networking and doing business in the construction industry. The highly focused sessions and discussions on business cases and market opportunities give attendees a clear understanding of the innovation trends and opportunity of the sector. In the last editions we have tackled the key role of deep retrofit for the real estate business and the strategies to put it in place at large scale.

REbuild is international: every year the event presents the best case studies in Italy and across the world, to find radical, concrete, effective, market-based approaches. For this reason, the convention is held both in Italian and in English and involves several foreign speakers in order to hear firsthand experiences.

*Every dream that you leave behind, is a piece of  
their future that no longer exists*

*Steve Jobs*
