GLOBAL/LOCAL APPROACH

Artelia is an independent group that operates throughout the world in a wide range of business lines – including Project & Construction Management, Engineering Design and Consultancy

VALUE ENGINEERING/INNOVATION

Artelia is committed to delivering the best services in terms of innovative solutions, value management, value engineering. With our own in-house experts and engineers, we provide a wide range of innovative services including:

- 100% BIM design in all our projects
- Energy performance solutions, through dynamic modelling of buildings
- Advanced solutions for façades, plant and services
- LEED/BREEAM/WELL accredited professionals to implement relevant protocols
- Wirescore accredited professionals
- Digital solutions for quality assurance / quality control of construction works with specific QA/QC collaboration tools

STRONG PRESENCE ON THE TERRITORY

Artelia in Italy has main offices in Rome and Milan, secondary offices in Bari and Florence, project offices in a number of other locations, employing about 400 staff in both Engineering Design and Project and Construction Management, working in close teamwork to bring real value to our Services and our projects.

WIDE EXPERTISE ENGINEERING DESIGN AND P&CM

We provide Customers with our combined expertise in Design and Management, this being an almost unique feature of our Company in the Italian market. A strong internal engineering department with a wide range of specialist skills and the expertise of Project and Construction Management, enables Artelia to successfully combine technical knowledge of engineering methods with the internationally used Project Management techniques.
